

DARKSTEW HOLLOW

*Joseph Coats,
Owen Manley,
Kyle Walbring*

What's it about?

Following the events of the Darkening, you must rebuild Ironhaven, a quaint village settled in the middle of Darkstew Hollow. Despite a prosperous past, the town has suddenly taken a turn for the worse. Equipped with only some second hand tools, can you rise to the challenge of bringing the town back to its former glory and discover the secrets of the mines below?

Motivation:

- ❖ Provide a fun and entertaining experience for players
- ❖ Takes inspiration from multiple games.
- ❖ Carries a unique twist overall.
- ❖ Offering engaging knowledge about geology (maybe archeology).

Functional Requirements:

- ❖ Progress should be made by rebuilding Ironhaven.
- ❖ Player should progress in the game through obtaining resources and defeating enemies.

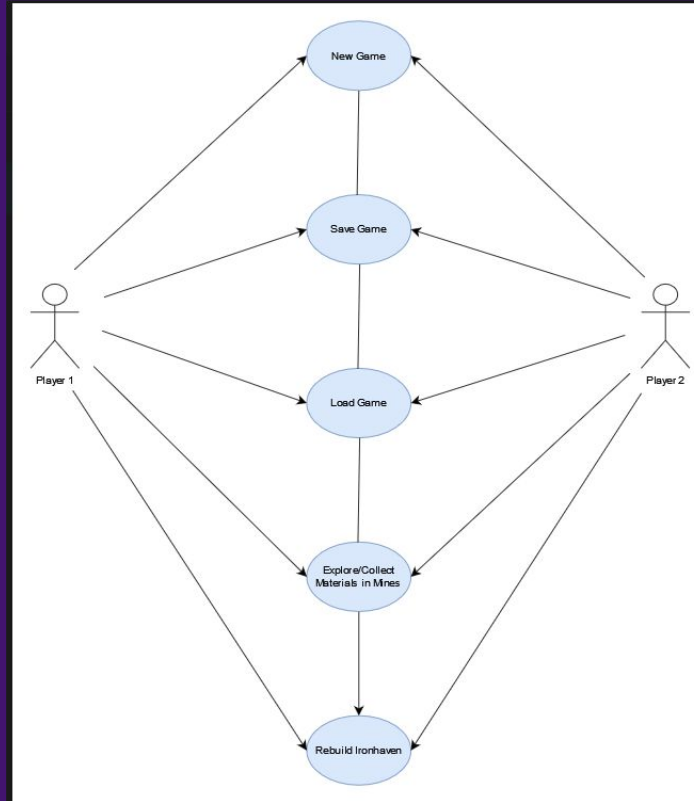

Non-Functional Requirements:

- ❖ Game should be able to perform on all kinds of hardware and on Windows.
- ❖ Game should not hurt pc performance.
- ❖ Should have a tutorial to teach the player how to play Darkstew Hollow.

Use Case Diagram

The Main Goal:

To create a dungeon-crawler multimedia experience that:

- ❖ Is functional
- ❖ Is interactive
- ❖ Features roguelike elements

that the player will familiarize themselves with throughout the course of their playing our game.

Interactivity

We want the player to be able to interact with the world we create.

Roguelike Elements

This includes things such as:

- ❖ Upgrades
- ❖ Procedural generation

Ideas:

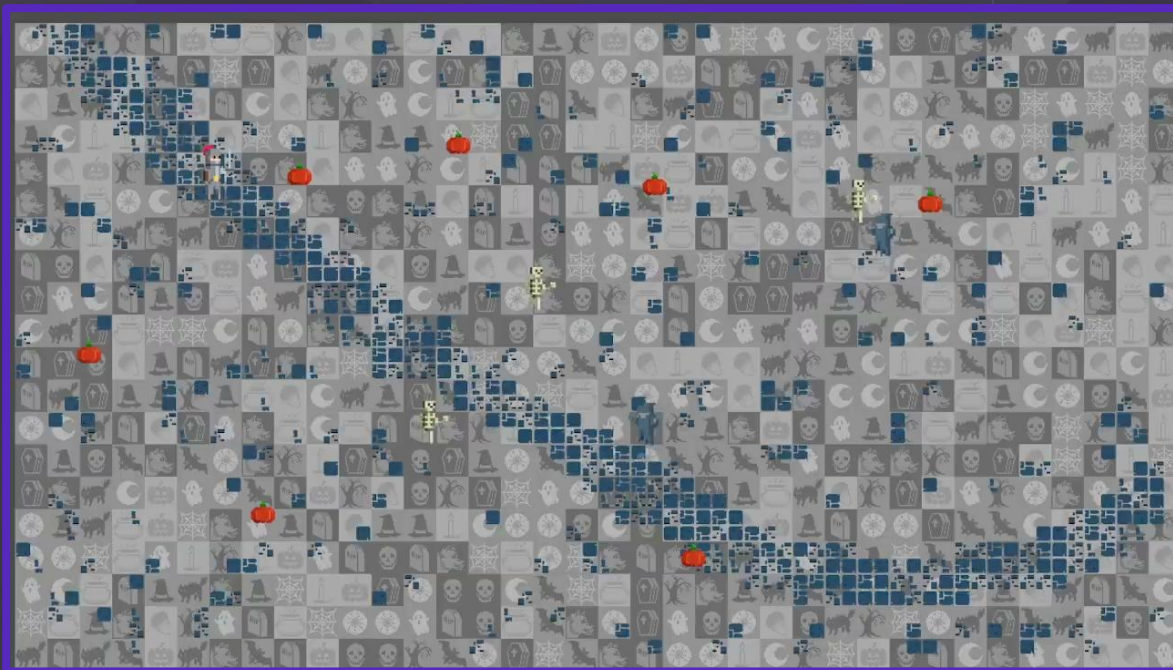

- Party Members
- Consumables
- Side Quests
- In-Game Achievements
- Pets

Pets:

- Dog/Wolf
- Slime
- Dino Skeleton?
- Bat

Demo

*all assets used in demo are
references that are subject to
change

Technical Challenges

- ❖ Our recent technical challenge:
 - C# is hardly supported in our game engine, we may likely use its native language.
- ❖ Possible ideas that will test our skills:
 - Procedurally generated caves
 - Procedurally generated towns
 - Custom physics

Ideas:

- Projectile Physics
- Procedural Towns
- We Literally Haven't Used Github Yet

Accomplishments

- ❖ Experience with Godot
- ❖ Functioning attack system that also makes damage numbers pop up
- ❖ Concept Art with In-Game Assets
- ❖ Developing Lore

Conclusion

We have a fun, educational game that stars a moustatio'd hero as he explores the mysterious depths of the Ironhaven mines.

- ❖ Variety of content
- ❖ Engaging story
- ❖ Detailed mechanics
